

Exporting from ICAT Classic

Please follow these instructions if you are exporting from ICAT Classic Software. If you are using an ICAT machine, but have [TxStudio / Invivo](#) software, please follow those instructions.

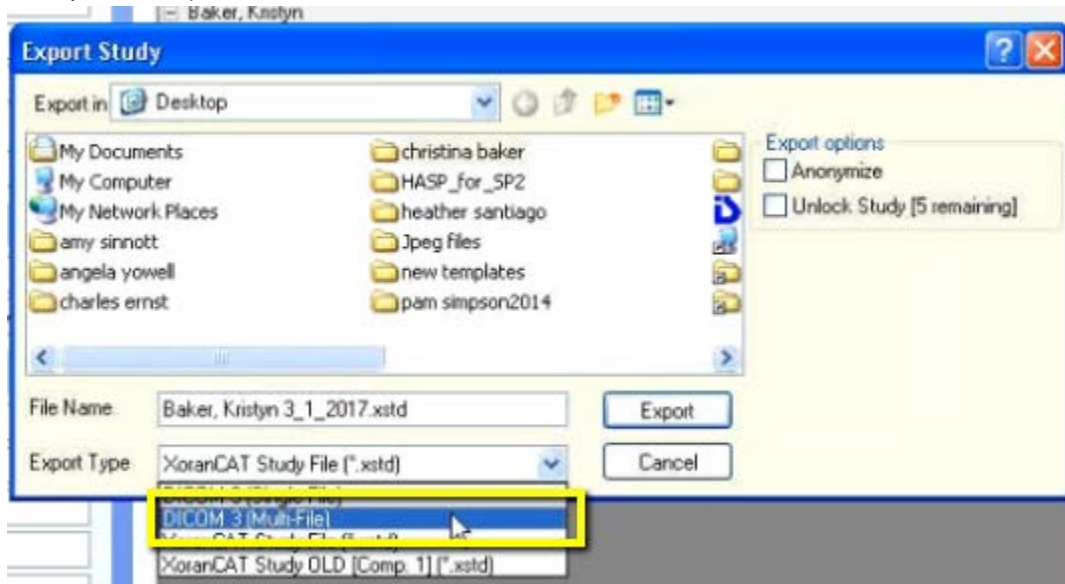

1. On your desktop, right click on an empty space. Go to “New” and click “Folder”. A folder will appear with highlighted blue text. Type in the patient name and push “Enter” on your keyboard.

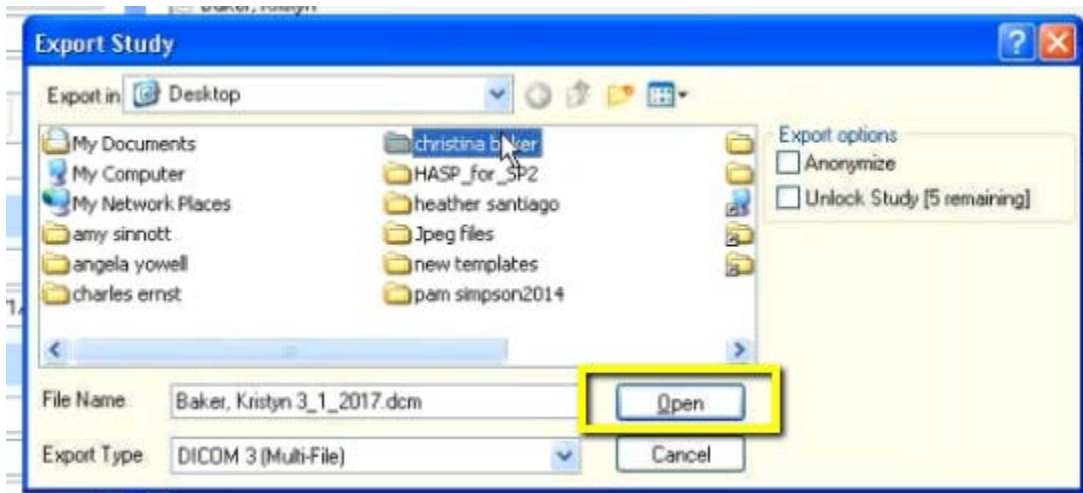

2. In the patient database, click on the patient name, and select the most recent CBCT. Click “Export”.

3. A pop-up will appear with the save location. Under “Export Type” ensure it reads “DICOM 3 (Multi-file)”.

4. Select the folder you just created on the desktop. Click “Open” and “Export”.

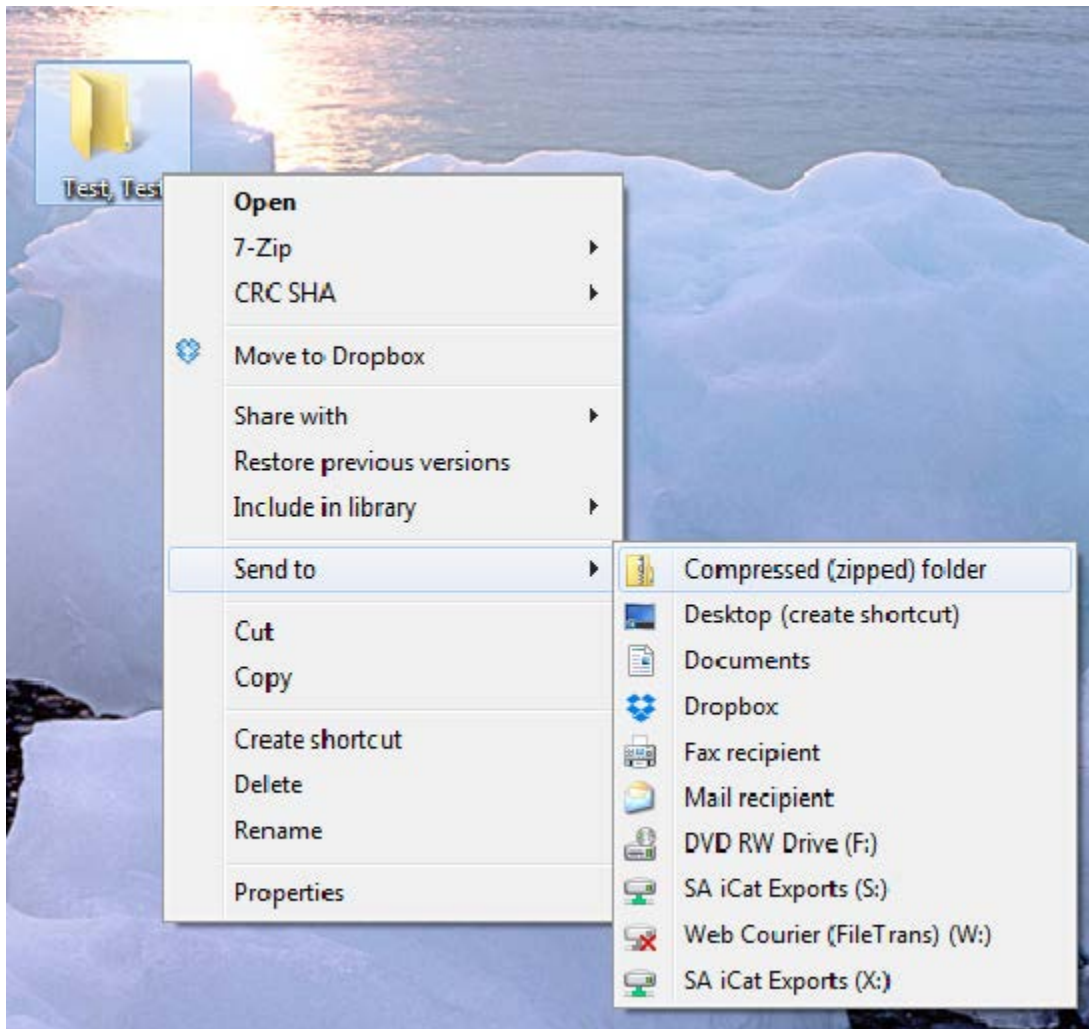

5. After the DICOM exports and saves, go to the patients folder and verify the .dcm files were exported correctly; there should be several hundred files.

6. Go back to the desktop, right click on the patients folder, go to “Send to”, and select “Compressed (zipped) folder”. A duplicate folder will be made with either a zipper on it, or a blue “Z”.

(** If following a Dual Scan Protocol, please zip scans individually and label accordingly; i.e: “Patient Scan” and “Denture Scan” **)

7. To upload the compressed folder, login to Implant Concierge. Click on the patient's name to open the case. Click on the red "Upload DICOM" button.
